Recruitment Solutionigh

KERBTECH INTERNATIONAL

Recruitment Solutions

INDIATOURISM

Kerbtech International provide to clients to offer the best of their services to the best fitting patrons. Our categorization of experience and affordability is never under the same head and it has strongly enabled us to promote the unique services of our hospitality partners to a wide array of worthy clients. Our excellent understanding of the nuances of tourism in India goes deeper than the mere advisory level.

Our services : Honeymoon packages, family tours adventurism tours religious tours and medical tour with rack bottom prices.

Places: UAE, QATAR, SAUDI ARABIYA, EUROPE, SINGAPORE, MALASIYA, SRI LANKA and NEPAL.

inbound

KERBTECH International travels the world, both bringing it to India and taking India abroad! We cater to inbound tourism, curating unforgettable experiences in India for international travelers. This could involve showcasing historical sites, arranging visits to cultural events, or planning adventurous treks.

outbound

We might also facilitate outbound tourism, helping Indian residents explore dream destinations around the globe. From planning itineraries to securing visas, We acts as a one-stop shop for creating incredible travelexperiences.

Export & Import:

Kerbtech International isn't just a domestic company; they're a global trader! We operates as a merchant exporter, shipping Indian-made products abroad. This could be anything from textiles and spices to electronics. By introducing these goods to international markets, we showcases India's manufacturing prowess and brings in foreign currency to benefit the economy.

Going beyond solar to boost local biodiversity

WE PROVIDE ROOFTOP AND GROUND MOUNTED AND FAÇADE SOLAR SYSTEM INSTALLATION AND MAINTENANCE SERVICES

The rapid deployment of solar power on a large scale is essential to limit global warming to 1.5°C. Solar will play a huge contribution to de-carbonizing the economy. Solar power has the lowest cost of electricity of all time and is scalable in nature.

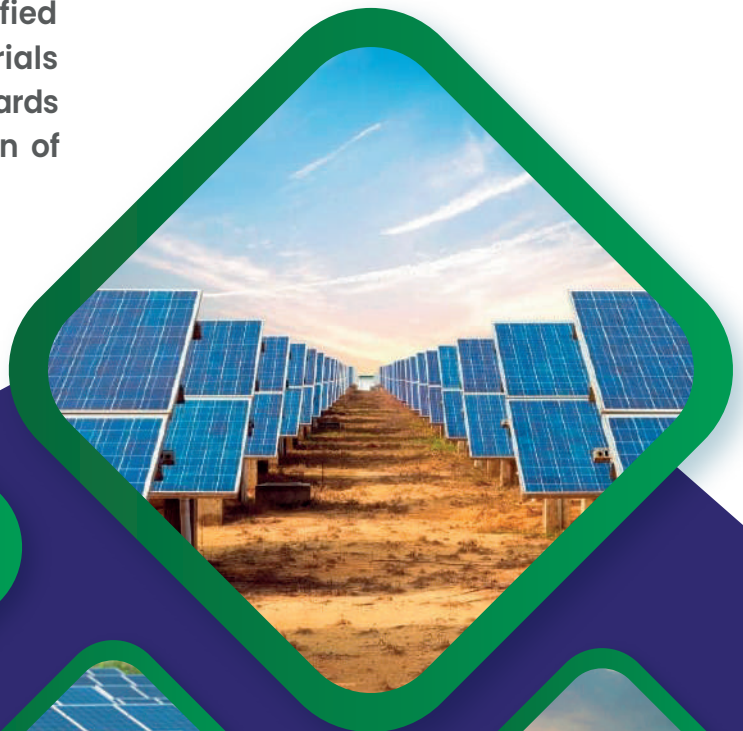

Solar systems can be integrated into building electrical infrastructure to reduce energy demand and save money on electricity bills. Building Integrated Photovoltaic (BIPV) can also be substituted with conventional building glass facades. BIPV modules are secured onto the prefabricated facades with a certified mounting system. All insulation materials used are compliant with relevant standards and installed under the supervision of professionals.

Our project execution team consists of highly skilled project supervisors and technicians supported by project-specific managers for the timely execution of projects. The ground support team provides end to end support in terms of design, process, and other related inputs to ensure the smooth execution of the projects.

We provide expertise in ground-mounted piling systems, civil drenching, installation of cables.

Installation of cable trays, installation of modules, commissioning, and testing. We also provide maintenance including cleaning of modules, testing of faulty strings and inverters, and preventive and corrective maintenance services.
